ODT RM+SM Connector

Release Notes V5.0.0.0

What's New

- **Add multiple Rental Units from Rental Contract to Service Ticket**
- **Added a setup option to use Rental Contract Customer on Service Tickets created from Delivery and Return Inspections.**
- **Added an option to select the No. Series used when auto creating Service Units**
  Service Units created from Rental Units or when selling Fixed Assets are sold will use the No. Series specified on Service Management Setup.
- **Added a prompt when synching meters between Rental and Service Units asking which meter reading to synch.**
  Prompt appears when the meter readings are different. The selected meter will have its reading synched between both units.
- **Added an option to toggle if Rental Units on an active Rental Contract can have their Service Meters updated.**
  If disabled, a prompt will appears advising that the meter can only be updated from the Rental Contract.

Issues Resolved

- **Fixed an issue where the toggle to disable meter synching was not working**
  Code has been modified so that disabling meter synching now functions correctly.
- **Fixed an issue where auto creating Rental and Service Units would create units that had not yet been received.**
  Code has been modified so that only received units will be auto created.
- **Fixed an issue where updating the synched meter on a Service Ticket for a unit that was on rent was not updating the meters correctly.**
  Issue has been resolved and synched meters will now update correctly.

Known Issues

- **No known issues at this time**

UPCOMING Releases – Planned Modifications and New Features

- **Create a Rentals+Service Role Center**

- **Add Apply Maintenance Expense action for Service Units linked to Rental Units linked to Serialized Items**
