

A company is a container for data unique to an organization. There can be multiple companies in your Dynamics 365 Financials tenant, which acts as the database.

Copying a company can be handy for making a backup and/or copying to test a transaction or new function.

Click on the search button  $\odot$ Assistance ∽ Status t started with Financials Seen ork with journals Seen the most out of reports and forecasting Seen tall extensions to add features and integration Seen Enter the text **Companies**. ٢  $\odot$ 2 X Click on the link in cell Name Type page or report name to start search: Companies 1 search results: All Lists Search the help for 'Companies' ? Name Department Administration/IT A Companies

Change your company to the new copy.
