Issues Resolved

- When invoicing Prorated terms where the Extended Quantity in Rental Amount Lines is a prorated quantity, a precision rounding error occurs.

Known Issues

- When using Prorated Rental Terms and create contract in one time zone where a Rental Amount Line has a prorated Extended Quantity and open in a different time zone the Extended Quantity in the Rental Amount Line is not the same.

- Rental Exchange cannot be used on Rental Units with Metered Usage or Periodic Usage pricing. Metered Usage Rental Amount Lines not invoiced are not being displayed on the replacement unit Rental Amount Lines and thus cannot be invoiced. Periodic Usage Entries on replacement units are not displayed correctly.

- Roll-up Packages with a blank Rental Return Date are returning an error disallowing the entering of a Rental Return Date on a component rental line.

- Rental Exchange when a unit being exchanged is being returned is triggering a confirmation message for whether all package lines are to be updated or not, when should not be.

- Undo Return errors and when ran on a component line within a standard rental package

- When copying Rental Units that have Dimensions, the Dimensions are not copied to the new units.

- When printing the Rental Contract, the Contract Total on the General tab on the contract may differ from the report total by pennies due to the tax rounding calculation when run the contract report.

- When on the Unit Avail. Matrix the user has set an Attribute with Value filter and closed the Filter Rentals by Attribute page and the lines have been filtered, and then go back into the Filter Rentals by Attribute page and clear the Value field and close page. The Attribute Filter is blank, but lines are not updated as the lines are still filtered by the attribute and attribute value. When go back into the Filter Rentals by Attribute page there are no records displayed. To get the lines to display without the filters, the user must add back the Attribute and Value in the Filter Rentals by Attribute page, select ok and then delete the data in the Attribute Filter field in the matrix options.

- On the Rental Contract, if all the rental lines are deleted, then on the General tab the Contract Total and Amount Outstanding fields are not cleared.

UPCOMING Releases – Planned Modifications and New Features

- Change Log Views for Rentals

- Provision of an option on Rental Management Setup to set the Qty to Rent on the rental lines to 0 by default

- Enhancement to provide the ability to specify an initial Rental Term, subsequent processing Rental Term and Final Rental Term
