## What's New

- **Added a warranty feature to service templates and service units**
  Units with a valid warranty will automatically have discounts applied to specified types of service
- **Added support for ODT Monetization**
- **Added the ability to automatically create Service Units when purchasing items from a purchase order.**
- **Added the ability to automatically create service units when purchasing or selling a fixed asset**
- **Added improvements to service checklists**
  Modified the Value field so it is limited based on the line type and displays proper error messages.

## Issues Resolved

- **Fixed an issue were an error would occur when attempting to automatically create a service unit from a sales order.**
  Code has been modified so that the error no longer occurs.

## Known Issues

- **No known issues at this time**

## UPCOMING Releases – Planned Modifications and New Features

- **Add a Work Description text field to Service Tickets**

- **Warranty Phase 2**
